

SHOXS Nitrogen Fill Kit Procedure

Filling the Mini Bottle

- 1. Connect ADAPTOR (2) to nitrogen supply tank
- 2. Close PRESSURE RELIEF VALVE (4) by turning clockwise
- 3. Connect COUPLER (5) to MINI BOTTLE (1)
- 4. Open nitrogen supply tank valve to fill MINI BOTTLE (1)
- 5. Close nitrogen supply tank valve
- 6. Slowly open PRESSURE RELIEF VALVE (4)
- 7. Disconnect COUPLER (5) from MINI BOTTLE (1)
- 8. If filling additional Mini Bottles, repeat steps 2 to 7

Attaching the Mini Bottle

- 1. Remove VALVE CAP (7) from MINI BOTTLE (1)
- 2. Close BOTTLE VALVE (6), turn black knob counterclockwise until stop
- 3. Screw in MINI BOTTLE (1) until snug

Filling a Shock

- 1. Close SILVER KNOB (5)
- 2. Open BOTTLE VALVE (6), turn black knob clockwise until stop
- 3. Connect CHUCK (4) to schrader valve on isolator
- 4. GAUGE (3) shows isolator pressure
- 5. Slowly open SILVER KNOB (5) to fill isolator to specified pressure. Refer to "Recommended SHOXSPRO Isolator Service Pressure" in supplied SHOXS Operation & Service Manual
- 6. Close SILVER KNOB (5)
- 7. If isolator is over-pressurized, release excess pressure using PRESSURE RELEASE VALVE (2)
- 8. If filling additional shocks, repeat steps 3 to 7
- 9. To safely store or transport the fill kit, close BOTTLE VALVE (6), back off black knob until stop
