For the safest, smoothest ride.
About SHOXS

SHOXS was founded on our commitment to leading safety standards and reducing injury to those in the military. This commitment has never wavered and forms the foundation of all our design and manufacturing — not just for military, maritime security, search and rescue, law enforcement and commercial support operations, but for anyone who spends time out on the water for whom safety and the effects of cumulative impact are a concern.

Our mission: To consistently raise the bar through superior engineering and functional design, integrating new technologies for ergonomics, durability, and most importantly, safety.

WE LISTEN. We constantly hear from customers that we take the time to listen, understand and respond to their needs with functional designs that help boat crews accomplish their goals. The SHOXS team have quickly become the “go to” experts for vessel manufacturers who seek proven designs for real world demand. That is why SHOXS is the most trusted brand for boat builders, maritime agencies and end users alike.
About our Customers

Military / Law Enforcement

Our company was built on the work we have done in partnership with military and law enforcement. Our innovations and advanced technology have always had their roots in the military, and the safety of our men and women in uniform have always been central to our company culture. The entire team at SHOXS is committed to leading safety standards and reducing injury to those who have dedicated their lives to serving their country and communities. We strive to provide these operators with the highest quality products to help keep them safe and effective in their missions at home and abroad. This is why SHOXS is trusted by the most demanding agencies on the planet.

Superior engineering and ergonomics allow operators to work more effectively, with a drastic reduction in both short and long-term impact trauma and physical fatigue. SHOXS has protected operators and extended careers all over the world, and brought crews home safely time and time again.

At SHOXS we get it done right because the stakes have never been higher. When it comes to safety and trust there are no cutting corners, there are no shortcuts.

Recreational

Our goal is simple: to transform the experience of impact so boaters can safely travel farther and faster, no matter the destination or conditions. Offshore anglers and thrill-seekers can now get to the horizon faster, stay on the water longer, and enjoy a smoother, more comfortable ride along the way. Premium materials and attention to detail create an unparalleled experience on the water.
SHOXS

Folding Deck Mount Footrest

ABOUT
For use with SHOXS Jockey seats to accommodate smaller sized users requiring a taller ride height, bridging the gap between the feet and the deck.

SPECS
Material CNC Aluminum, 316 Stainless Steel
Base Weight 5 lb/2.2 kg

CATEGORIES
Accessories

TYPICAL USE
Typically used in front of SHOXS jockey seats or helm seating, the folding footrest provides a secure foot hold for shorter occupants, yet stows easily when not in use with taller occupants.

The footrest creates higher sightlines by providing a secure standing point on deck. Marine grade hardware holds up in wet conditions, and provides a lightweight, robust and simple solution.

Foot tread stows when not in use
Adjustable Height Foot Rest

ABOUT
Bulkhead mounted, adjustable height footrest with folding tread. Foot actuated lever allows simple and easy adjustment up and down to fit any sized occupant.

SPECS
Material: Aluminum, 316 Stainless Steel
Base Weight: 10 lb/4.5 kg

CATEGORIES
Accessories

OPTIONS
Height Adjustment
Tread Angles 0-14°

TYPICAL USE
Designed for use with seats without integrated footrests. The footrest is 100% marinized and ready for anything you can throw at it. An extra wide tread makes the footrest extra comfortable for long transits.

The tread folds away to allow for unobstructed passage in front of the seat. A foot-actuated lever installed center-line on the tread allows the user to move the footrest up and down, no tools required.

Mounts to wall or console face
6 inches of height adjustment
SHOXS TRAXS

ABOUT
The SHOXS TRAXS Mounting System is designed to enable professional operators to quickly re-configure wheelhouse and deck layouts on all types of craft.

SPECS
Material 6061 - T6 Extruded Aluminum
Installation Flush Mount or Surface Mount

CATEGORIES
Accessories

TYPICAL USE
The SHOXS TRAXS deck mounting system creates and easy way to relocate seats on the boat or remove them completely. Payload space can be created in front of, behind or between personnel as required.

The SHOXS TRAXS system can also be utilized to secure the payload using SHOXS marinized tie down fittings.

Nitrogen Fill Kit

ABOUT
The Nitrogen Fill Kit is a self-contained, portable charging kit designed to quickly confirm and accurately adjust the isolator’s pressure.

SPECS
Includes Digital Gauge with charging hose
Refillable Nitrogen bottle
Nitrogen refill valve and hose

TYPICAL USE
A compact, on-board kit for confirming pressure and charging SHOXS isolators. A digital display of the isolator condition makes it easy to quickly inspect multiple seats during pre-deployment checks.

An all-inclusive storage bag makes stowing and transporting the kit simple and hassle-free. An easy port connection is included and pressure safety valves prevent over-fill. The Nitrogen bottle is easily refillable.

Armrest Mounted Controls

ABOUT
For use in helm/operator seating, the armrest mounted controls provide an ergonomic, safe way for operators to experience shock mitigation and precise engine control simultaneously.

SPECS
Materials CNC Aluminum, 316 Stainless Steel
Base Weight 15 lb / 6.8 kg

CATEGORIES
Accessories

TYPICAL USE
The controls allow the binnacle to be in mitigation with the occupant, optimizing performance and minimizing fatigue. Integrated trim and kill switches provide an additional level of engine control.

The control pod stows away for easier access to the seat, allowing quicker movement around the helm station. The armrest controls can accommodate up to dual lever electronic binnacles, along with mounting additional communication equipment.
Camera System Armrest Controls

ABOUT
Armrest mounts to accommodate night vision controls. Minimizes fatigue and enhances accuracy and control.

SPECS
Materials CNC Aluminum, 316 Stainless Steel
Base Weight 1 lb / 0.5 kg

CATEGORIES
Accessories

TYPICAL USE
Multiple mounts available for all types of night vision controllers including FLIR M-Series and Sea-FLIR remote camera systems.

Armrest controls create an ergonomic solution for optimal control on high speed craft where accuracy matters.

Computer / NAV / OP Workstation

ABOUT
Workstations provide a table top functionality to allow for the mounting of frequently used equipment like chart plotters, FLIR cameras and communications equipment.

SPECS
Materials CNC Aluminum, 316 Stainless Steel
Base Weight 34 lb / 15 kg

CATEGORIES
Accessories

TYPICAL USE
Only available on SHOXS seats, the integrated workstations keep helm-mounted equipment like navigation equipment, cameras, binnacles, laptops, and radios in mitigation with the operator.

Typically used on high-speed command craft and multi-mission vessels, the workstations can minimize fatigue by having frequently-used items within arm's reach.

Enhances operator control and performance
Ruggedized for extreme environments

SHOXSPRO Isolators

ABOUT
SHOXSPRO Isolators are designed to provide safe and simple adjustable suspension performance on SHOXS shock-mitigated seats.

SPECS
Hydro Pneumatic Isolator
2 Position Adjustment
Weight Range Light to Heavy Occupants

CATEGORIES
Accessories

TYPICAL USE
For military and professional operators this enables seat occupants to set and forget the suspension, with no distractions from the mission.

SHOXSPRO Isolators are insensitive to occupants weight, therefore adjustments with air pumps and damping knobs are not required. With SHOXSPRO, a two position selector is moved from lighter to heavier occupants.

Uncompromising safety regardless of occupant weight

Adjustments require no more than one second
